

AEROSPACE ENGINEERING (LM52)

(Brindisi - Università degli Studi)

Teaching DESIGN AND TESTING OF POWER CONVERTERS AND ELECTRICAL MACHINES

GenCod A005678

Owner professor Marco PALMIERI

Teaching in italian DESIGN AND TESTING OF POWER CONVERTERS AND

Teaching DESIGN AND TESTING OF POWER CONVERTERS AND ELECTRICAL

SSD code ING-IND/32

Reference course AEROSPACE ENGINEERING

Course type Laurea Magistrale

Credits 6.0

Teaching hours Front activity hours: 54.0

For enrolled in 2020/2021

Taught in 2020/2021

Course year 1

Language ENGLISH

Curriculum CURRICULUM AEROSPACE SYSTEMS

Location Brindisi

Semester First Semester

Exam type Oral

Assessment Final grade

Course timetable

<https://easyroom.unisalento.it/Orario>

BRIEF COURSE DESCRIPTION

The course introduces the main components of an aeronautical electrical system, with a particular focus on power electronics converters and electrical machines.

REQUIREMENTS

Fundamentals of physics.
Fundamentals of electrotechnics.
Fundamentals of electric measurements theory.

COURSE AIMS

At the end of the course the student will know the main aeronautical electrical system components used to generate, distribute and consume the electric energy on board the aircraft. The autonomy of judgment will be developed both by deepening the design of the experiments and by the critical analysis of experimental data. The part of the course dedicated to the exercises includes group work. Communication skills and learning abilities will also be verified during the oral examination.

TEACHING METHODOLOGY

Whole class teaching (lectures).
Computer-aided simulations and laboratory experiences.

ASSESSMENT TYPE

Oral exam (plus written report on the laboratory experiences)

FULL SYLLABUS

Introduction, electric power evolution in aircraft electrical systems and main components of the electrical system.
AC\DC electric power conversion.
DC\DC electric power conversion.
DC\AC electric power conversion.
DC Electrical machines (generators\motors)
AC Electrical machines (generators\motors)
Standards for testing aeronautical electrical and electronic components and documentation for the qualification of an aeronautical devices
Laboratory experiences
Computer-aided modeling, simulation and analysis of power converters
Computer-aided modeling, simulation and analysis of electrical machines
